

Accessibility

This website has been designed with both accessibility and usability in mind, you should therefore have no problems in viewing all of the information publicly accessible within our website. If however for whatever reason you feel you do have an accessibility issue with our website, or have any comments regarding accessibility, please feel free to contact us at any time and we would be pleased to help resolve any issue to allow you to fully participate in our website.

Our accessibility features

The following accessibility features have been incorporated throughout our website:

- There is a text equivalent for every non-text element.
- All documents are organised so that they can be read without style sheets.
- When scripts such as JavaScript are turned off all pages are still useable.
- Relative units are used in fonts so that users can control the text size.
- No pop-up or new windows are used without informing the user.
- Navigation bars & mechanisms are used in a consistent manner.
- Font and background colours have been chosen to allow best access to all text on the site.
